Other Tools From Vogel

Vogel Tool & Die INVENTED the pipe notcher and was issued the original US patent in 1934. Today, as a Division of Manor Tool & Manufacturing Company, we continue to offer our Arc-Fit pipe notchers and other tools for fabricating parts from tube and pipe. All Vogel tools are made with pride in the USA, featuring American steel and American heat-treating. Imported tools may look similar, but poor quality steel and improper heat-treating may lead to significantly reduced tool life and poor performance. Vogel tools are designed and built to last and provide many years of dependable performance.
